Profile Summary

An action-oriented and self-motivated engineering student with a strong foundation in Full Stack Development, eager to embrace challenges and explore innovative ideas and technologies. Committed to leveraging my skills and adaptability to contribute effectively to the growth and success of the organization.

Projects

Zwigato - *Java, JDBC, JSP Servlets, MySQL.*

March 24 - April 24

- Created a complete platform designed to order food online.
- This Food Delivery Application allows users to browse restaurants, view menus, add items to a cart, and place orders. It includes pages for restaurants, menus, user info, cart, checkout, and order confirmation.
- Some of the implemented features include:
 - Robust Access Controls
 - Restaurant, Menu and Order Management
 - Dynamic Updates

Source - <https://github.com/chandanshr23/Zwigato>

Employee Payroll - *Java, JSP, JEE, Hibernate, Spring, MySQL.*

March 24 - April 24

- Employee Payroll Management System is a web-based application that automates employee data and payroll management with secure role-based access. It allows admins to manage records and generate salaries while employees can view their pay slips.
- Some of the implemented features include:
 - Authentication
 - Secured login for employee and admin
 - Detailed Payroll Generation
